Objective

To use my creative passion for developing Full Stack Web Applications to bring value to the Web Development Community and collaborate with other developers to enhance the world with better applications.

Technical Skills

Frontend: HTML5, CSS, Bootstrap, Bulma, jQuery, JavaScript, AJAX, React

Backend: MySQL, MongoDB, GraphQL, Express, Node, Handlebars, Webpack, Service Workers

Projects

Food4Thought

Server/Authentication

<https://github.com/Dapr1nc3/Food-App>

<https://.dapr1nc3-food-app.herokuapp.com/>

- A Recipe App that allows users to search for recipes
- Allows users to sign up for an account, login, search for recipes and save favorite recipes to their profile page.
- Tools/Languages: Bootstrap, React, Node, Express, MongoDB, GraphQL

What's Out There

Project Leader

<https://github.com/bdoneq7/whats-out-there>

<https://bdoneq7-whats-out-there.herokuapp.com/>

- A UFO Sighting Blog that allows users to research sightings, vote for sightings, and make comments.
- Allows users to research UFO sightings in one place rather than having to search for each sighting separately. Users can vote for shared sightings and contribute their own sightings. My responsibilities included being the Project Leader and creating the frontend functionality and design.
- Tools/Languages: Bulma, Node, Express, MySQL, and Handlebars.

What 2 Watch

Page Layout / Carousel

<https://github.com/bdoneq7/what-to-watch>

<https://dapr1nc3.github.io/what-to-watch/>

- When you need to Find the Right Movie
- Allows users to save time finding popular movies to watch.
- Tools/Languages: Bulma, Jquery, Ajax

Work Experience

Independent Contractor
